Directive No. 3

Frequency usage during the forthcoming season

Flying inside the Gliding sector:

1. All flights done **below FL 145** will have to make position reports on **123,4 MHz.**
2. All flights **above FL 145** must make position reports on **124,7 MHz.**

Flights inside of the Buffer zone should be minimized:

1. All flights done below **FL 100** must make report reports on **123,4MHz.**
- 2 All flights that go above FL100 to max. FL145 must report on **124,7 MHz.**

Please adhere to these new Regulation and make sure every pilot is briefed accordingly, because these are the conditions for giving us permission to fly by DCA, ATC and ANS. We will be watched and scrutinized very closely.

Regards
Wolfgang Buhrow
