Directive No. 4/2016

RADIOTELETELEPHONY

NCAA has reported to me that **English** is not being used at the club assigned frequencies and within the published Gliding area.

Please take note: According to the AIP of Namibia all radio work has to be performed in English. Since all frequencies assigned to each club are official we need to use the **English** language at all times.

It is also an international licensing requirement that all crew members operating in international general aviation hold, as a minimum, a level 4 English proficiency endorsement in their license. Please make sure that at least one pilot in an double seater meets this requirement.
